

**Skin Infections / Baytril in Veterinary Dermatology /  
Antimicrobial Spectrum**

1/1

Baytril covers the most relevant Gram-positive and Gram-negative pathogenic bacteria involved in canine and feline skin disease. Excellent antimicrobial activity against Staph. intermedius could be demonstrated in vitro and under clinical conditions.

<b>Comparative efficacy of Baytril® vs. other commonly used antibacterial agents (in vitro)</b>					
	<b>Staphylococcus</b>	<b>Escherichia coli</b>	<b>Pasteurella</b>	<b>Proteus</b>	<b>Pseudomonas</b>
Baytril	●●●	●●●	●●●	●●●	●●●
Amoxicillin	•	•	●●●	●●	-
Amoxi-Clav.	●●●	●●	●●●	●●	-
Cephalexin	●●●	●●	●●●	●●	-
Gentamicin	●●●	●●●	●●●	●●●	●●
Amikacin	●●●	●●●	●●●	●●●	●●●
potentiated Trimethoprim	●●	●●	●●●	•	-
Erythromycin	●●	-	-	-	-
Clindamycin	●●	-	-	-	-
●●● = excellent ●● = good • = fair - = none
